DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to methods of retaining curl in a keratinous material or to enhancing curl or imparting curl to a keratinous material, classified in class 424, subclass 70.2.
- II. Claims 19 and 20, drawn to a hair styling composition or to an eyelash cosmetic composition comprising transglutaminase, classified in class 435, subclass 193.

The inventions are distinct, each from the other because of the following reasons.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process of Group I, curl retention in hair, or curling or curl enhancement of hair, may be achieved by methods such as perming, using rollers or using commercial curl retention products, e.g., Curlfriends products, Matrix Curl.life products or KMS Curl Up products. Curl may be retained or created in eyelashes by using an eyelash curler. The product of Group II, a composition comprising an effective amount of transglutaminase, may be used in other processes, such as post-translation modification of proteins, fluorescent labeling of

proteins and as a food additive to enhance the properties of protein-containing foods (see the Ajinomoto website at <http://www.ajinomoto-europe-sales.de/englisch/activa/activa01.htm>). Further, these inventions are distinct and have acquired a separate status in the art as shown by their separate classifications. Thus, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
